

HEAVY WIRE SCREENS

BUILT TO PERFORM IN THE TOUGHEST CONDITIONS

Agile Heavy Wire Screens are engineered for high impact applications where strength, durability and reliability are critical. Designed to withstand tough materials and demanding conditions, they deliver long wear life, consistent performance and reduced downtime.

IMPROVE
THROUGHPUT

REDUCE
DOWNTIME

LOWER
COST PER TONNE

BEST USED FOR

- ✓ Primary screening
- ✓ Scalping decks
- ✓ High impact applications
- ✓ High tonnage plants
- ✓ Quarry operations
- ✓ Hard rock processing

KEY BENEFITS

Improved
throughput

Longer
wear life

Reduced
maintenance
interruptions

Safer
handling

Lower
cost per
tonne

COMMON CHALLENGES SOLVED

CHALLENGE	AGILE SOLUTION
Excessive wear	High tensile construction improves service life
Reduced throughput	Open area optimisation improves material flow
High maintenance downtime	Durable construction reduces changeouts
Demanding applications	Designed for heavy duty screening environments

AVAILABLE CONFIGURATIONS

FEATURE	OPTIONS
Aperture Range	Extensive range of Industry Standard and Made to Order availability
Wire Diameter	Multiple sizes available
Wire Type	High Tensile Carbon Steel Stainless Steel
Hook Types	45D 180D Custom hook arrangements
Panel Widths	Custom
Panel Lengths	Custom
Weave Type	Square Rectangular Long Slot

INDUSTRIES SERVED

Quarry

Mining

Recycling

WHY AGILE SCREENING?

- ✓ Decades of screening experience
- ✓ Heritage across Locker, Screenex and Melwire
- ✓ Technical product selection and application support
- ✓ National capability and local service
- ✓ Focused on reliability, productivity and cost per tonne
